

# BEVAN ESTERHUIZEN

## **BIO**

Bevan is a Junior Scientist working at the Non-Communicable Disease Research Unit at the South African Medical Research Council.

He holds a Master's degree in Nanoscience from the University of the Western Cape and a Bachelor's degree in Medical Bioscience from the same institution. He has contributed to various public health projects, the most recent being FOODSAMSA.

Bevan is the project coordinator for WP5 of FOODSAMSA, where his work involves data collection, stakeholder engagement, and developing models to promote healthier food choices in local communities, supporting public health initiatives and improving health outcomes in South Africa.
